```

5. docker images help

```
Command Prompt

C:\Users\MOAD>docker images --help

Usage:  docker images [OPTIONS] [REPOSITORY[:TAG]]

List images

Aliases:
  docker image ls, docker image list, docker images

Options:
  -a, --all             Show all images (default hides intermediate images)
      --digests         Show digests
  -f, --filter filter   Filter output based on conditions provided
      --format string   Format output using a custom template:
                        'table':            Print output in table format
                        with column headers (default)
                        'table TEMPLATE':   Print output in table format
                        using the given Go template
                        'json':             Print in JSON format
                        'TEMPLATE':         Print output using the given
                        Go template.
                        Refer to https://docs.docker.com/go/formatting/
                        for more information about formatting output with
                        templates
      --no-trunc        Don't truncate output
  -q, --quiet           Only show image IDs
      --tree            List multi-platform images as a tree (EXPERIMENTAL)

C:\Users\MOAD>
```
